

Overview

The Empty Fixture for T8 Tubes is a durable and versatile lighting housing specifically designed to hold T8 LED tubes. It provides secure mounting and proper electrical connection, and can come with an internal reflector for better light distribution, a clear cover for protection and light diffusion, or without a cover depending on the application. Available in single or double tube configurations, it is ideal for commercial, industrial, and utility lighting. It comes in surface-mounted or suspended models, with optional waterproof or dustproof protection for different environments.
